Zipy is a powerful react js bug tracking tool specifically designed for React applications. With Zipy, you can easily monitor your react js application's performance metrics and gain valuable insights into how your code performs in real-time. Try Zipy today and take your development to the next level.

We are Zippies

We believe in fixing what matters for customers, teams, and companies. We are a bunch of techies on a mission to give customers an awesome digital experience on their websites and mobile apps and help software teams do this efficiently.

Tired of stitching data across tools and logs?

One tool that has it all - session replays, network calls, console logs, stack traces, user details and more.

Alert fatigue? Don't know what to prioritize?

Ignore third party errors and mute what is not an error for you. Filter errors for your critical users or workflows in seconds to prioritize.

Worried about data privacy and performance?

Your PII and sensitive data is masked by default. Zipy is optimised for load and run times. If you want to know more, read [here](#).

Highly priced monitoring tools?

Debug at affordable prices with Zipy. Multiple tools can be replaced with one - and that too without much instrumentation. Check our [Plans](#).
